

Appendix 7. Transboundary Important Bird Areas.

The following text lists, for each country that has one or more transboundary sites, the number of such IBAs in the country, the name of the neighbouring country/countries with which it shares its transboundary site(s), followed by the codes for the native sites, each accompanied by the code(s) of the adjoining site(s) in the neighbouring country/countries.

For example,

“Ireland (3)

United Kingdom: IE004/UK278; IE027/UK282; IE122/UK274...”

indicates that, in Ireland, there are three transboundary sites: Irish site 004 adjoins UK site 278, Irish site 027 adjoins UK site 282, and Irish site 122 adjoins UK site 274.

This is a working list rather than a definitive set of sites, having been compiled at the end of the project, from the information immediately available to the editors (in terms of site descriptions, coordinates and site areas), without recourse to the original data-providers to confirm or check the exact relationships among all potential sites. It is often not clear whether the IBAs actually meet across the relevant border(s), or whether they are just very close but do not form an integral management unit. Thus the list provides an initial picture of the potential extent of transboundary IBAs within Europe, and will be refined with time.

In summary, there are approximately 207 transboundary IBAs in Europe (c.6% of the total number of IBAs in Europe). The protection and management of these areas will often require a higher degree of international cooperation than that already required for IBA conservation in general.
