**Criteria** —

*Calidris ferruginea* breeds in a narrow latitudinal range in the central Siberian Arctic, and winters mainly in western and sub-Saharan Africa. Although a tiny proportion of its global population occasionally winters in Iberia, the species is primarily a passage visitor to Europe. Consequently, its status in Europe is Not Evaluated.

Country	Winter pop. size (individuals)	Year(s)	Trend	Mag.%	References
Portugal	50 – 200	95–97	(F)	(–)	19,20,21
Spain	0 – 1,800	90–01	–	50–79	19
