

Pelecanus crispus

DALMATIAN PELICAN

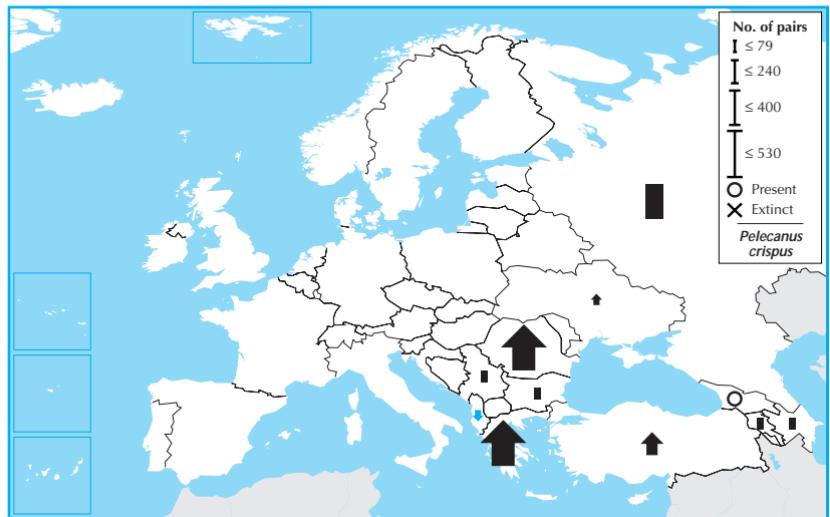

SPEC 1 (1994: 1) Status Rare
Criteria <10,000 pairs

European IUCN Red List Category —
Criteria —

Global IUCN Red List Category VU
Criteria A2c; A3c

Pelecanus crispus breeds locally in south-eastern Europe, which accounts for less than half of its global breeding range. Its European breeding population is small (as few as 1,600 pairs), but increased substantially between 1970–1990. Despite marked declines elsewhere within its global range during 1990–2000, the species underwent a moderate increase overall in Europe. Nevertheless, its population size still renders it susceptible to the risks affecting small populations, and consequently this globally threatened species is evaluated as Rare in Europe.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Albania	19 – 19	92-02	–	50-79	4
