RV*

Oenanthe isabellina is a widespread summer visitor to south-eastern Europe, which accounts for less than a quarter of its global breeding range. Its European breeding population is very large (>2,100,000 pairs), and was stable between 1970–1990. Although there were declines in Russia during 1990–2000, the stronghold population in Turkey was stable, and trends were stable or increasing across the rest of its European range. The species hence remained stable overall, and consequently is provisionally evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Armenia	13,000 – 16,000	98–02	0	0–19	
Azerbaijan	(10,000 – 100,000)	96–00	(0)	(0–19)	
Bulgaria	1,500 – 4,000	96–02	+	0–19	
Georgia	Present	03	?	–	
Greece	(50 – 200)	95–00	(0)	(0–19)	
Romania	500 – 700	00–02	+	20–29	17,32
Russia	(50,000 – 150,000)	90–00	–	20–29	8
Turkey	(2,000,000 – 6,000,000)	01	(0)	(0–19)	
Ukraine	4,000 – 7,000	90–00	+	5–9	
Total (approx.)	2,100,000 – 6,300,000	Overall trend Stable
