Global IUCN Red List Category —

Criteria —

Petronia xanthocollis has a predominantly Middle Eastern and Asian breeding distribution, which just extends into Europe in south-eastern Turkey. Its European breeding population is small (as few as 500 pairs), and its trend between 1970–1990 was unknown, but it probably increased during 1990–2000. Although the size of the European population could render it susceptible to the risks affecting small populations, it is marginal to a much larger non-European population. Consequently, the species is provisionally evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Turkey	(500 – 2,000)	01	(+)	(–)	
Total (approx.)	500 – 2,000	Overall trend Increase			
Breeding range	>20,000 km ²	Gen. length. <3.3 %			Global pop. <5
