Prunella modularis is a widespread breeder across much of Europe, which constitutes >95% of its global breeding range. Its European breeding population is extremely large (>12,000,000 pairs), and was stable between 1970–1990. Although there were declines in France and Sweden during 1990–2000, populations increased or were stable elsewhere in Europe, and the species remained stable overall. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Albania	(500 – 1,000)	02	(0)	(0–19)
