Criteria —

Serinus serinus is a widespread breeder across most of Europe (except for the north and east), which constitutes >75% of its global range. Its European breeding population is very large (>8,300,000 pairs), and increased between 1970–1990. Although there were declines in France and Malta during 1990–2000, populations increased or were stable elsewhere in Europe—including the key Spanish population—and the species was stable overall. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Albania	5,000 – 20,000	02	(0)	(0–19)
