HUNTING AND TRAPPING LEGISLATION/ RESOURCES

Name of main legislation: In the UK hunting law is a national issue, therefore several hunting laws exist: Wildlife and Countryside Act 1981 for England, Scotland and Wales; Wildlife (Northern Ireland) Order 1985

Year of publication: see above

Supporting legislation:

Legislation updates: In England and Wales the law has been amended by the Countryside and Rights of Way Act 2000 and in Scotland by the Nature Conservation (Scotland) Act 2004.

Hunting legislation (web link): http://www.legislation.gov.uk/browse

Authority in charge of controlling hunting (web link): Home Office (Police) UK National Wildlife Crime Unit http://www.nwcu.police.uk/

Major inconsistencies or loopholes detected (if yes please describe):

The UK lacks a system of licensing for hunting, with no statutory limits applied to hunting bags, or statutory requirement to submit returns. Questions have been raised about consequences for the UK’s compliance with principles under Article 7 of the Birds Directive, including “wise use”, “ecologically balanced control” and requirement not to “jeopardise conservation efforts” for huntable or non-huntable species. The lack of a licensing system also limits the capacity of authorities to apply restrictions on hunting in response to incidents of wildlife crime.

Note: the devolved Scottish Government have commissioned a review of game licensing systems in Europe, which is expected to report this year.

Derogations (on EU Birds Directive and/or Bern Convention): None

HUNTING AND TRAPPING: METHODS AND RESTRICTIONS

<table>
<thead>

<tbody>
<tr>
<td></td>
<td>- Certain game bird species can be hunt during the open shooting season (see below)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- There is no requirement to hold a hunting licence.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Certificate is needed to use shotgun, rifle or other firearm (no certificate needed to use air rifles and air pistols, although a licensing requirement is being introduced in Scotland)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Certain locations can be forbidden (eg above the high water line for some waterfowl)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Falconry licence needed to hunt birds with a falconry bird.</td>
<td></td>
</tr>
</tbody>
</table>
- Shooting at night is not permitted in some areas (all of Northern Ireland and via local restrictions in England, Wales and Scotland). Exceptions apply for pest control purposes.
- It is illegal to use:
  - Any springe (sprung noose or snare), trap, gin, snare, any electrical device for killing, stunning or frightening, or any poisonous, poisoned or stupefying substance (or hook and line or muscle-relaxing agent – Northern Ireland only) so placed as to be calculated to cause bodily injury to any wild bird
  - Any net, any baited board, bird-lime or substance of a like nature to bird-lime
  - Any bow or crossbow
  - Any missile which is not discharged from a firearm including any arrow or spear (Northern Ireland only),
  - Any metal bar, axe, hatchet, cudgel, club, hammer or similar instrument (Northern Ireland only)
  - Any explosive other than ammunition for a firearm.
  - Any automatic or semi-automatic weapon against any bird (except the Bird Pest Species listed on the general licences)
  - Any shotgun where the barrel has an internal diameter at the muzzle of more than 1¾ inches
  - Any device for illuminating a target or sighting device for night shooting or any form of artificial light or any mirror or other dazzling device (except feral pigeon Columba livia under general licence)
  - Any gas or smoke, any chemical wetting agent
  - Any sound recording
  - Any live animal or bird as a decoy which is tethered, secured by braces or other similar appliances, or which is blind, maimed or injured.
  - Any mechanically-propelled vehicle in immediate pursuit of birds for the purpose of killing or taking.

Trapping

An authorised person may legally use cage-traps or nets to take certain species as defined in the General Licences (see pest section)

HUNTING SEASONS AND SPECIES

Hunting seasons differ in the different nations. In the ‘Open Hunting Season’ column are given the maximum opening season for each huntable species and national differences are mentioned in the ‘Notes’ column.

conditions of General Licences. No one has to apply for a general licence. The purposes, species of birds and terms and conditions may be different in England, Wales, Scotland and Northern Ireland. General licences typically are renewed once a year and can change.

For controlling pests, it is possible to:

- trap or kill permitted animals
- use permitted methods to kill animals
- only use poison to kill the pests it’s intended for
- only use traps that have been approved for this use

Control methods allowed under the General Licence may include shooting, the destruction of eggs and nests, and the use of Larsen traps and multi-catch traps, which includes the use of decoy birds within such traps.

transposing Article 9, with corresponding thresholds which apply.
