

# MONGOLIA

LAND AREA 1,565,008 km<sup>2</sup> HUMAN POPULATION 2,740,000 (2 per km<sup>2</sup>)

NUMBER OF IBAs 41 TOTAL AREA OF IBAs 16,584 km<sup>2</sup> STATUS OF IBAs 12 protected; 4 partially protected; 25 unprotected

The only active breeding colony of Dalmatian Pelican *Pelecanus crispus* in eastern Asia is at Airag Nuur (IBA 7). (PHOTO: SIMBA CHAN)

## KEY HABITATS AND BIRDS

- There are extensive coniferous boreal forests (*Biome 02: Boreal forest – Taiga*) in parts of northern Mongolia, in the Khentii mountains, around Lake Khovsgol, on the north and east sides of the Khangai mountains and in parts of the Khan Khokhii range.
- Alpine habitats in the Altai and other high mountains in western and central Mongolia have communities of high montane species (*Biome 05: Eurasian high montane – Alpine and Tibetan* and SA 077: *Mongolian mountains*), including the threatened White-throated Bushchat *Saxicola insignis*.
- Mongolia retains vast areas of relatively unspoiled steppe grassland, semi-desert and desert (*Biome 04: Eurasian steppe and desert*), which support important populations of several threatened species including Lesser Kestrel *Falco naumanni* and Great Bustard *Otis tarda*.
- Wetlands in the steppe zone support large numbers of breeding and migrating waterbirds, notably the threatened Dalmatian Pelican *Pelecanus crispus*, Swan Goose *Anser cygnoides*, White-naped Crane *Grus vipio* and Relict Gull *Larus relictus*.

## CONSERVATION INFRASTRUCTURE AND PROTECTED AREAS SYSTEM

In Mongolia, wildlife conservation and the establishment of protected areas are under the jurisdiction of the Ministry for Nature and the Environment. In 1993, the Agency for Protected Areas and Eco-tourism was established as part of the Ministry.

Although the first officially protected area in Mongolia was established in 1778, modern legislation on protected area was not enacted until 1975, when the “Procedure on Strictly Protected Areas of Mongolia” was approved. Subsequent laws and regulations on

protected areas included the “Law on Special Protected Areas” (1994) and the “Law on Buffer Zones of Special Protected Areas” (1997). The Government of Mongolia passed “The General and Special Regulations of Strictly Protected Areas and National Parks” in 1995 and the “The National Program on Special Protected Areas” in 1998.

As of 2004 there were 56 protected areas in Mongolia, covering a total area of 210,063 km<sup>2</sup>, or about 13.5% of the country. The protected areas in Mongolia are classified as: Strictly Protected Areas, National Parks, Nature Reserves and Natural Monuments. Mongolia plans to establish more protected areas, and aims to increase protected areas coverage of the state to c.30% by 2030. Mongolia ratified the Ramsar Convention in 1997, and by 2004 there were 11 Ramsar Sites in the country covering a total of 14,395 km<sup>2</sup>.

## OVERVIEW OF THE INVENTORY

- Mongolia is a large country with a very low human population, and in many places the birds and other biodiversity have not yet been surveyed. The IBAs listed here include all sites in Mongolia that are proven to meet the global IBA criteria, but only cover just over 1% of the total land area of the country. It is anticipated that future field surveys will identify many more sites which qualify as IBAs, especially to improve coverage of forest, grassland and desert habitats.
- Of the 41 IBAs in Mongolia, 40 support globally threatened species, four have restricted-range species, 25 have biome-restricted species and 38 qualify as IBAs because they hold large congregations of migratory waterbirds.
- Seven IBAs (17%) contain boreal forest, 20 IBAs (49%) contain steppe grassland, 10 IBAs (24%) include desert and two IBAs (5%) contain rocky mountain habitats.

- Thirty-nine of the 41 IBAs contain wetland ecosystems. Outstanding wetland IBAs in Mongolia include Uvs Nuur (IBA 6), Airag Nuur (IBA 7), Khar Us Nuur (IBA 10), Ogi Nuur (IBA 27), Onon-Balj (IBA 34) and Mongol Daguur (IBA 36).

**CONSERVATION ISSUES**

- The level of threat to Mongolia’s IBAs is currently relatively low in comparison to those in most other Asian countries. However, some Mongolian IBAs and their biodiversity are under pressure from overgrazing by livestock, illegal logging of forest, dam construction, mining, fires, large-scale usage of rodenticides, human disturbance, predation by feral dogs, cutting of reeds, drainage of wetlands, hunting and periodic drought causing drying up of wetlands.
- As Mongolia develops economic links with neighbouring countries, the construction of new roads and other infrastructure could lead to increased pressure on the countries’ natural resources, and a higher level of threat to the IBAs. For example, a new bridge crossing is planned from China into eastern Mongolia, and a “Milleneum highway” across the country. The proposals for these and other development projects should be subject to environmental impact assessments at the strategic level, to consider the potential impacts of the whole development

process on the environment (including IBAs), and to plan the mitigation of any negative impacts.

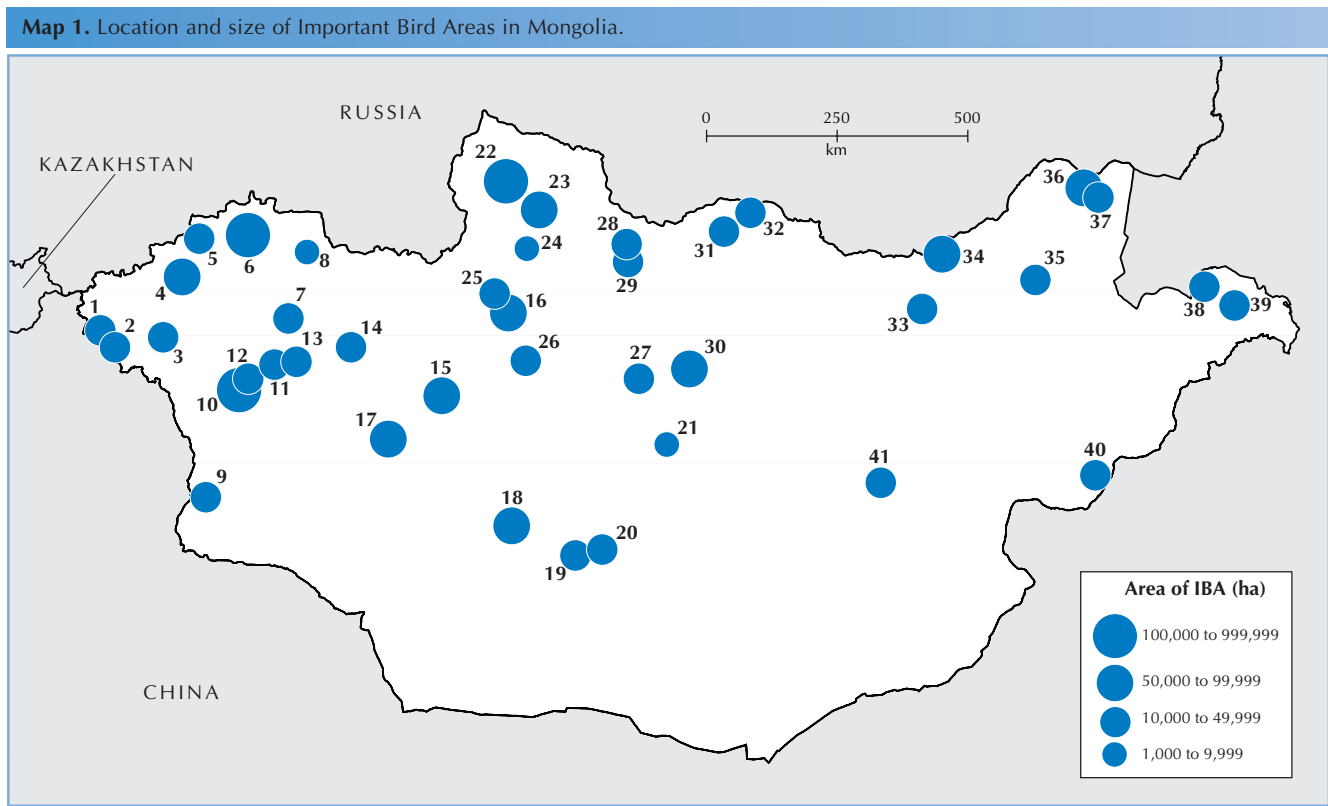

- Of Mongolia’s 41 IBAs, 12 (29%) are wholly within protected areas, four (10%) are partially protected, and 25 (61%) are unprotected. In terms of area, 44% of Mongolia’s IBA network is included within protected areas.

**SOURCES OF IBA DATA**

This initial IBA list was compiled for this publication by Bazarsad Chimed-Ochir, Natsagdorj Tsevenmyadag, Ayurzana Bold, Batbayar Nyambayar, Radnaabazar Bolor, Simba Chan and Axel Bräunlich.

Table 1 ... continued. Important Bird Areas in Mongolia.				
<b>36</b>	<b>Mongol Daguur</b>	Partially protected <sup>AP,R</sup>	■ A1	■ A3 ■ A4i
<p><b>Admin region</b> Dornod <b>Coordinates</b> 49°43'N 115°15'E <b>Altitude</b> 610–821 m <b>Area</b> 65,000 ha <b>Habitats</b> Grassland; Wetlands  <b>Threatened species</b> <i>Anser cygnoides</i>, <i>Grus leucogeranus</i>, <i>Grus vipio</i>, <i>Grus monacha</i>, <i>Grus japonensis</i>, <i>Otis tarda</i>, <i>Vanellus gregarius</i>, <i>Larus relictus</i>, <i>Megalurus pryori</i> ■ <b>Biomes</b> AS04: Eurasian steppe and desert ■ <b>Congregatory waterbirds</b> <i>Podiceps cristatus</i>, <i>Phalacrocorax carbo</i>, <i>Cygnus cygnus</i>, <i>Anser fabalis</i>, <i>Tadorna ferruginea</i>, <i>Grus vipio</i>, <i>Grus virgo</i>, <i>Grus grus</i>, <i>Grus monacha</i>, <i>Vanellus vanellus</i></p>				
<b>37</b>	<b>Khukh Nuur</b>	Unprotected	■ A1	■ A3 ■ A4i
<p><b>Admin region</b> Dornod <b>Coordinates</b> 49°31'N 115°35'E <b>Altitude</b> 566–615 m <b>Area</b> 13,200 ha <b>Habitats</b> Grassland; Wetlands  <b>Threatened species</b> <i>Anser cygnoides</i>, <i>Grus vipio</i>, <i>Grus monacha</i>, <i>Otis tarda</i>, <i>Larus relictus</i> ■ <b>Biomes</b> AS04: Eurasian steppe and desert  <b>Congregatory waterbirds</b> <i>Podiceps cristatus</i>, <i>Phalacrocorax carbo</i>, <i>Cygnus cygnus</i>, <i>Anser cygnoides</i>, <i>Aythya ferina</i>, <i>Grus virgo</i>, <i>Vanellus vanellus</i></p>				
<b>38</b>	<b>Buir Nuur</b>	Unprotected <sup>R</sup>	■ A1	■ A3 ■ A4i,iii
<p><b>Admin region</b> Dornod <b>Coordinates</b> 47°46'N 117°48'E <b>Altitude</b> 583–609 m <b>Area</b> 43,200 ha <b>Habitats</b> Grassland; Wetlands  <b>Threatened species</b> <i>Ciconia boyciana</i>, <i>Anser cygnoides</i>, <i>Anas formosa</i>, <i>Haliaeetus leucoryphus</i>, <i>Falco naumanni</i>, <i>Grus leucogeranus</i>, <i>Grus vipio</i>, <i>Otis tarda</i>, <i>Larus relictus</i> ■ <b>Biomes</b> AS04: Eurasian steppe and desert ■ <b>Congregatory waterbirds</b> <i>Podiceps cristatus</i>, <i>Phalacrocorax carbo</i>, <i>Ardea cinerea</i>, <i>Anser cygnoides</i>, <i>Tadorna ferruginea</i>, <i>Tadorna tadorna</i>, <i>Vanellus vanellus</i></p>				
<b>39</b>	<b>Tashgain Tavan Nuur</b>	Unprotected	■ A1	■ A3 ■ A4i
<p><b>Admin region</b> Dornod <b>Coordinates</b> 47°22'N 118°27'E <b>Altitude</b> 714–823 m <b>Area</b> 31,200 ha  <b>Habitats</b> Artificial landscapes (terrestrial); Grassland; Wetlands  <b>Threatened species</b> <i>Anser cygnoides</i>, <i>Aythya baeri</i>, <i>Grus vipio</i>, <i>Grus japonensis</i>, <i>Otis tarda</i> ■ <b>Biomes</b> AS04: Eurasian steppe and desert  <b>Congregatory waterbirds</b> <i>Podiceps cristatus</i>, <i>Anser cygnoides</i>, <i>Tadorna ferruginea</i>, <i>Tadorna tadorna</i>, <i>Anas strepera</i>, <i>Aythya ferina</i>, <i>Grus vipio</i>, <i>Grus virgo</i>, <i>Vanellus vanellus</i></p>				
<b>40</b>	<b>Ganga Nuur</b>	Protected <sup>R</sup>	■ A1	■ A3 ■ A4i
<p><b>Admin region</b> Sukhbaatar <b>Coordinates</b> 45°15'N 114°00'E <b>Altitude</b> 1,227–1,537 m <b>Area</b> 32,800 ha <b>Habitats</b> Desert; Wetlands  <b>Threatened species</b> <i>Anser cygnoides</i>, <i>Grus vipio</i>, <i>Otis tarda</i> ■ <b>Biomes</b> AS04: Eurasian steppe and desert ■ <b>Congregatory waterbirds</b> <i>Podiceps cristatus</i>, <i>Cygnus cygnus</i>, <i>Anser cygnoides</i>, <i>Tadorna ferruginea</i>, <i>Tadorna tadorna</i></p>				
<b>41</b>	<b>Ikh Nartiin Chuluu Nature Reserve</b>	Protected	■ A1	■ A3
<p><b>Admin region</b> Dornogobi <b>Coordinates</b> 45°43'N 108°38'E <b>Altitude</b> 1,200 m <b>Area</b> 43,740 ha <b>Habitats</b> Grassland; Rocky areas  <b>Threatened species</b> <i>Falco naumanni</i> ■ <b>Biomes</b> AS04: Eurasian steppe and desert</p>
