

Location of Important Bird Areas that contain areas which qualify as Ramsar Sites in Cameroon

Designation progress

Areas within six Important Bird Areas qualify currently as Ramsar Sites in the Republic of Cameroon, of which none has been designated as yet.

Summary of Important Bird Areas that contain areas which qualify as Ramsar Sites in Cameroon

IBA code	IBA name	IBA area (ha)	Ramsar Site name	Ramsar Site area (ha)	Ramsar criteria			
					2	4	5	6
Ramsar designation of IBA lacking (6 IBAs)								
CM001	Kalamaloué National Park	4,500			●		●	
CM002	Logone flood-plain	500,000			●	●	●	
CM003	Waza National Park	170,000			●	●	●	
CM004	Lake Maga	50,000				●	●	
CM032	Nki	200,000			●			
CM033	Lobéké National Park	217,000			●			
Grand total					4	4	3	4

For the full details of each site, including bird populations, see Fishpool and Evans (2001) and the Data Zone at www.birdlife.net by 2003. See 'Identifying potential Ramsar Sites' (p.11) for a description of the site- and species-selection procedure and the method for evaluating adequacy of Ramsar coverage that have been used in this report.

Threatened species

Within the four IBAs that contain areas that qualify as Ramsar Sites under Criterion 2, two wetland-dependent species of global conservation concern occur regularly in significant numbers.

Summary of the occurrence of wetland species of global conservation concern within the selected IBAs

Species name and global threat status (IUCN 2000; see p.147)

IBA code	Black Crowned-crane <i>Balearica pavonina</i> (LR/lnt)	Dja River Warbler <i>Bradypterus grandis</i> (VU)	Grand total
CM002	●		1
CM003	●		1
CM032		●	1
CM033		●	1
Grand total	2	2	4
