

# *Ammoperdix griseogularis*

SEE-SEE PARTRIDGE

**SPEC 3** (1994: —) **Status** Vulnerable

**Criteria** See IUCN below

**European IUCN Red List Category** VU

**Criteria** C1

**Global IUCN Red List Category** —

**Criteria** —

*Ammoperdix griseogularis* is resident in Azerbaijan and southern Turkey, with Europe accounting for a tiny proportion of its global range. Its European breeding population is small (as few as 1,000 pairs), but was stable between 1970–1990. Although the tiny population in Azerbaijan was stable during 1990–2000, the species declined markedly in Turkey, and underwent a moderate decline (>10%) overall. As a consequence of this decline and its small population, this previously Secure species is now evaluated as Vulnerable.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag. %	References
Azerbaijan	(5 – 50)	96–02	(0)	(0–19)	
Turkey	(1,000 – 2,000)	01	–	20–29
