*Podiceps grisegena* is a widespread breeder across much of central, eastern and northern Europe, which accounts for less than a quarter of its global breeding range. Its European breeding population is relatively small (<56,000 pairs), but was stable between 1970–1990. Although there were declines in countries such as Ukraine and Poland during 1990–2000, other sizeable populations in Russia and Finland were stable or increased, and the species declined only slightly overall. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Armenia	2 – 8	97–02	–	30–49
