Criteria —

Turdus viscivorus is a widespread breeder across much of Europe, with >50% of its global breeding range occurring in the region. Its European breeding population is very large (>3,000,000 pairs), and was stable between 1970–1990. The species remained stable overall during 1990–2000, with increases in the sizeable German population at least partly compensating for declines elsewhere—notably in France and the United Kingdom. Crucially, the key population in Russia remained stable. Consequently, the species is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag. %	References
Albania	2,000 – 5,000	02	?	–
