Serinus citrinella is endemic to Europe, with its fragmented distribution confined to central and south-west regions of the continent. Its population is large (>250,000 pairs), and increased between 1970–1990. Although trends were not available for the populations in France or the Spanish stronghold during 1990–2000, there was no evidence to suggest that the species's status deteriorated. Consequently, it is provisionally evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Andorra	(500 – 1,000)	99–01	(0)	(0–19)	1,3
Austria	(1,500 – 5,000)	98–02	(0)	(0–19)	
France	8,000 – 40,000	98–02	?	–	4
Germany	3,600 – 5,700	95–99	–	0–19
